

Flat radiators

heatingthrough**innovation.**

With natural perfection.

Hardly any system is as rich in finding unique ideas and as perfect in inventing **brilliant solutions** than Nature itself. Thinking and acting with the natural strive for **innovation** also forms the basis for our progressive solutions in **technology and design** of our flat radiators. Solutions that efficiently combine **ecology and economy** and meet all heating needs of the future.

heating through innovation. – Come with us and discover a completely new world of warmth. Not only does our current range of flat radiators combine **innovative designs** with first-class technology, but it also offers the advantages you expect from us, with our **unique package of services**. The high heating capacity and energy-saving function of the flat radiators reflect nature's economic way of solving problems. At the same time they create a perfectly comfortable indoor climate. So, read on and be inspired by our innovative flat radiators.

More technology. More service.

Plan radiators.

The absolute calm of the flat surface is combined with ultra-modern heating technologies.

Profile radiators.

Top heating capacity, a sense of wellbeing with low energy consumption, and modest, clear designs set the standard.

T6 PLAN CENTRALLY CONNECTED RADIATOR.

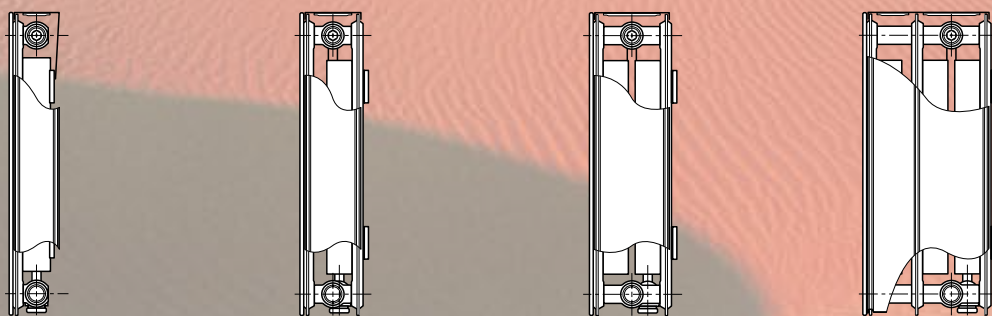

quiet, smooth,
puristic.

Product advantage
T6 PLAN CENTRALLY
CONNECTED RADIATORS
with easy-to-clean smooth front surface.

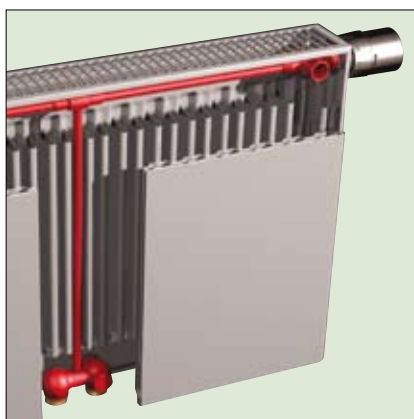

Dimensions in mm.

Type	11 PM					21 PM-S					22 PM					33 PM				
	single-layered with one convector plate					two-layered with one convector plate					two-layered with two convector plates					three-layered with three convector plates				
	300	400	500	600	900	300	400	500	600	900	300	400	500	600	900	300	400	500	600	900
	up to 2400		up to 2600		up to 2000	up to 2400		up to 3000		up to 2000	up to 3000			up to 2000		up to 3000	up to 2200			up to 1800
Increments	all overall length starting with 400 mm in increments of 200 mm; additionally 520, 720, 920, 1120 and 1320 mm																			

T6 PLAN CENTRALLY CONNECTED RADIATOR.

T6 PLAN CENTRALLY CONNECTED RADIATOR radiate **calmness** and the appearance of the puristically smooth surface. They blend perfectly into every room layout.

Detail:

The **T6 PLAN CENTRALLY CONNECTED RADIATOR** impresses with the central position of its connections and the uniform wall clearance which facilitates easy planning and installation.

T6 CENTRALLY CONNECTED RADIATOR.

Product advantage

The special tube arrangement in the **T6 CENTRALLY CONNECTED RADIATOR** allows the integrated valve to be replaced with a few quick turns of the hand, even after assembly.

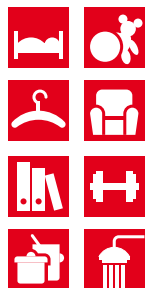

symmetrical,
extraordinary,
practical.

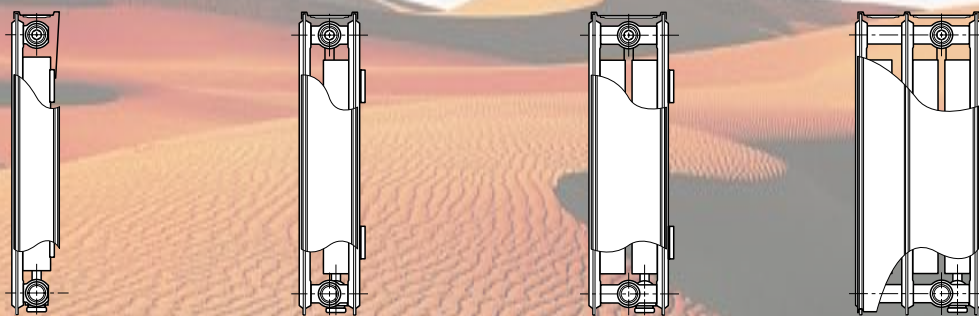

Product advantage

The **T6 CENTRALLY CONNECTED RADIATOR** impresses with its central connection and the uniform wall separations, which reduce the expense associated with planning and assembly.

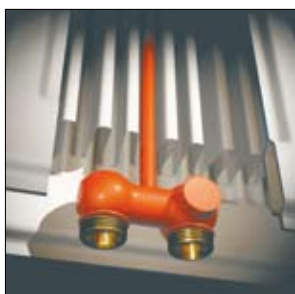

T6 CENTRALLY CONNECTED RADIATOR.

T6 CENTRALLY CONNECTED RADIATORS are the ultimate in **symmetry**, the perfect combination of design and unique patented technology. This, together with the special geometry of the convection plates, gives the **T6** the best heat output in its class, enabling it to heat a room exceptionally fast and guaranteeing a maximum of thermal comfort.

Dimensions in mm.

Accessories.

VONOMAT wall console

A highly promising advantage in terms of safety is offered by the **VONOMAT wall console**, which is equipped with an integrated anti-lift retainer and an integrated position retainer. It is the ultimate in simple, fast and uncomplicated radiator installation.

Assembly rail set

In combination with the **assemble angle** 3/4" external thread for installation on prefabricated and unfinished walls, the assembly rail set is used to simply and conveniently locate the attachment points for the **wall console** or the drill consoles. (The adapter plate is also required for the **assembly angle set** 3/4" external thread for installation on unfinished walls).

Assembly angel set 3/4" external thread for installation on unfinished walls

The **assembly template** enables complete installation of the heating pipes without a radiator. The complete pipe system can be pressure-checked, while the radiators are delivered only once building construction is complete. The assembly template is suitable for all **T6 CENTRALLY CONNECTED RADIATORS** and **T6 CENTRALLY CONNECTED PLAN RADIATORS**. Ideal for use in brick-built constructions.

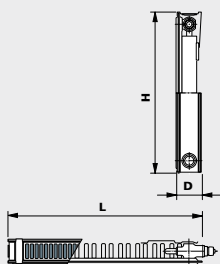

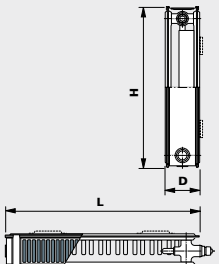

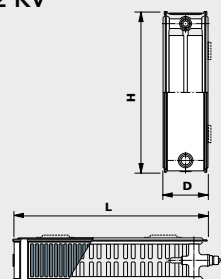

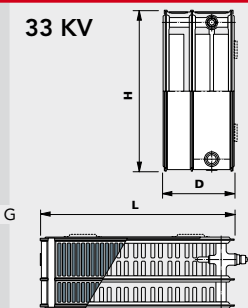

Assembly angel set 3/4" external thread for installation on prefabricated walls

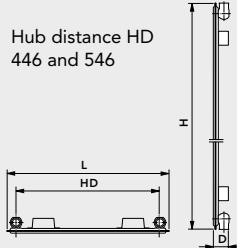

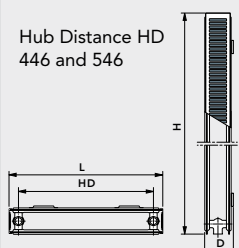

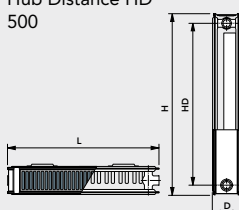

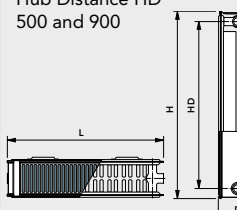

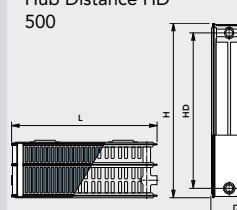

The **assembly template** enables complete installation of the heating pipes without a radiator. The complete pipe system can be pressure-checked, while the radiators are delivered only once building construction is complete. This means there is no risk of damage to the radiators. The assembly template is suitable for all **T6 CENTRALLY CONNECTED RADIATORS** and **T6 CENTRALLY CONNECTED PLAN RADIATORS**.

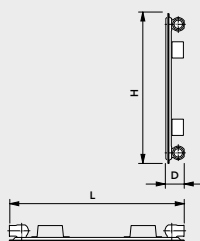

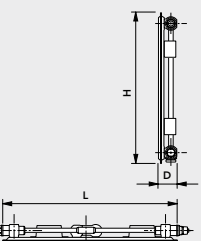

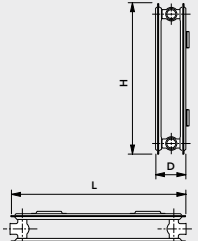

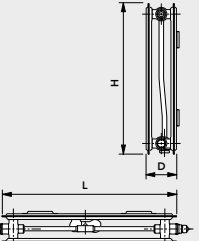

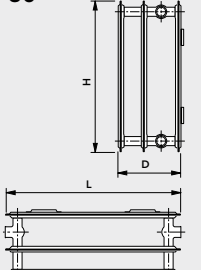

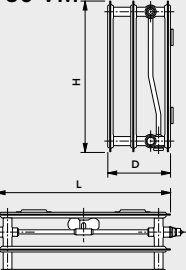

Décor clip

The décor clip is eye-catching, has an original design and does what it says. It is used to secure the top cover and lends each room its own special tone through the large colour range in RAL and sanitary colours, as well as refined surfaces, even when added at a later point in time. It is easy to remove, which in turn makes the radiator simple and straightforward to clean.

Product description & scope of delivery

VOGEL&NOOT flat radiators are high-quality designer products which are outstandingly suitable in all areas thanks to the choice of connection and living situations available. Each model gives each area of application its own personal note. You can choose from between the following models:

T6 CENTRALLY CONNECTED PLAN RADIATOR

This product proves itself in two important areas simultaneously: the design of its elegant, flat front and its flexible connection options. Here as well, the ready-to-connect product is supplied as a centre connection radiator with a factory sealed thermostatic valve, bleed, blind and special vent plugs, a top cover and closed side parts and in a special ready-to-assemble pack. Can be used in single-pipe and double-pipe systems and with universal connection options.

T6 CENTRALLY CONNECTED RADIATOR

The radiator is a ready-to-connect product with high-quality centre connection technology, supplied with a factory sealed thermostatic valve, bleed, blind and special vent plugs, a top cover and closed side parts and in a special ready-to-assemble pack. Fits single- and double-pipe systems, and can be used universally as a centrally connected valve radiator and compact radiator.

COMPACT RADIATOR

This product is noted for its simplicity. It is easy to connect via 4 x internal thread 1/2" and is comes in versions for single-pipe and double-pipe systems. The radiator is delivered with a top cover and closed side parts and comes in a special ready-to-assemble pack.

MULTIFUNCTION RADIATOR

This radiator is a ready-to-connect product with factory-sealed thermostatic valve, bleed, blind and special vent plugs, a top cover and closed side parts, delivered in a special ready-to-install pack. Fits single and double-pipe systems and can be used universally as a valve or compact radiator.

VERTICAL RADIATOR

If you are short on space, then go for the vertical option. This version is noted for the small amount of space required and easy cleaning. It can be used as a compact radiator. The Type 20 radiator is supplied with side panels in a special ready-to-assemble pack.

HYGIENIC RADIATOR

This product is noted for its clean function. Easy cleaning and maintenance are possible without convection panels and covers. This product is available as a compact radiator and also as a centrally connected valve radiator. The valve model comes with a factory sealed thermostatic valve, bleed, blind and special vent plugs, while both variants come in a special ready-to-assemble pack.

MODERNIZATION RADIATOR

New from old. Here, the modernization radiator is the right product for you. Place the new radiator 1:1 on the old connectors, and you've completed the upgrade. Very little work and hardly any dirt; just great energy savings instead. This product is available in a compact version, and is supplied with a top cover and closed side parts.

Operating conditions

The maximum operating temperature for all flat radiator models is set at 110°C.

Surface finish

High-quality, eco-friendly double coat of paint to DIN 55900, ready painted with an electrostatically applied powder coating.

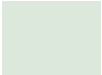

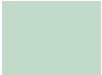

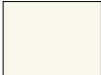

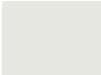

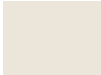

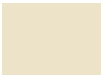

Strong brands of highest quality

VOGEL&NOOT offers its customers strong brands with the highest quality standards. The production processes at all manufacturing locations are ISO certified. The quality and performance specifications of **VOGEL&NOOT** flat radiators are constantly checked and confirmed by recognised European institutes.

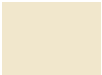

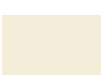

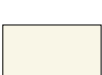

These quality symbols, found on all **VOGEL&NOOT** flat radiators, offer you reassurance in terms of heating capacity and product quality.
